SUMMARY

AI/ML-focused computer science student at VIT Bhopal and founder of Yap-less. Builds production systems (a secure WhatsApp automation platform deployed at KC Degree College), autonomous-driving agents in CARLA, real-time computer vision and research on news sentiment and stock prediction. Seeking research, programming and data analysis internships.

EXPERIENCE

Founder & CEO - Yap-less 2026 - Present
Navi Mumbai

- Founded Yap-less and lead product, engineering and strategy. (More details and website coming soon.)

Freelance Software Engineer - Security'26 & Club-Desk Jun 2026 - Present
Churchgate, Mumbai

- Developed a secure WhatsApp automation system on the Meta WhatsApp Cloud API for personalized notifications, reminders and appointment updates.
- Built web platform features including user authentication, account management and role-based access control.
- Designed a Firebase-backed backend to secure confidential user information and store real-time data.
- Integrated Vercel, Cloudflare, Firebase and WhatsApp APIs for reliable data synchronization.
- Deployed the platform for use by KC Degree College, Mumbai; further client discussions underway.
- Leading its evolution into a subscription-based appointment-scheduling agent for healthcare providers and local businesses.

Research Paper (in progress) - Independent research Jul 2026 - Present
Vashi, Navi Mumbai

- Does News Sentiment Improve Stock Prediction? A comparative study using FinBERT and machine learning models for sentiment analysis on stock prices.

PROJECTS

Portfolio XP HTML · CSS · JavaScript · Canvas · Vercel

This site: a Windows XP desktop in the browser with draggable windows and icons, Paint, a Command Prompt, a calendar with reminders, and six games (Solitaire, Spider Solitaire, Minesweeper, Snake with 10 maze levels, Brick Breaker with 12 levels, Pinball with rank missions). No framework, no build step.
github.com/MendhiVadi/medhansh-xp | medhansh-xp.vercel.app

Medinator TypeScript · React · Vite · Supabase · Vercel

Clinical reasoning practice for medical students (MBBS finals / NEET-PG): simulated patient cases scored against an information-gain benchmark, one-minute Rapid Fire diagnosis, exam-style MCQs, spaced-repetition flashcards and an Akinator-style Bayesian diagnosis game, with user and campus leaderboards.
github.com/MendhiVadi/Medinator | medinator-zeta.vercel.app

Autonomous Driving Agent Python · CARLA 0.9.16 · Imitation Learning · RL (in progress)

CARLA self-driving agent with a manual driving host, a map-and-controls cockpit, an imitation-learning policy that drives from road and vehicle state, and an authenticated two-computer control link for a reinforcement-learning trainer.
github.com/MendhiVadi/autonomous-driving-agent

Vision Assist Python · YOLO (Ultralytics) · Computer Vision · Text-to-Speech

Real-time webcam scene description for visually impaired users: detects objects with YOLO and says what it sees and where ("very close: a person ahead, two chairs on the left"), as a web app with an API or a desktop app.
github.com/MendhiVadi/vision-assist | vision-assist-two.vercel.app

Asteroid Watch TypeScript · Vite · 3D Graphics · Python · Orbital Mechanics

3D browser dashboard of 42,670 known near-Earth asteroids from NASA JPL data. Fast Kepler orbits for every object, accurate N-body simulation for the one you pick, and impact / approaching / receding screening to 2100.
github.com/MendhiVadi/asteroid-watch

Land Dispute TypeScript · React · Firebase · Firestore

AI-augmented platform for location-based land-grievance reporting and staff review, with Forest Rights Act claim monitoring that puts scattered records on one interactive map.

github.com/MendhiVadi/FI-Monitoring | forest-watch-eight.vercel.app

Carbon Logistics React · Vite · Firebase · Vercel · Live ADS-B data

India-focused multimodal shipping planner that compares routes, modes, cost, ETA and emissions, with live flight positions, timetable-based train and ferry tracking, and secure owner-scoped parcel bookings.

carbon-logistics.vercel.app

EDUCATION

VIT Bhopal University Aug 2025 - Jul 2029

B.Tech, Computer Science · Expected CGPA: 8.5 - 9 · Bhopal, Madhya Pradesh

- Coursework: Coding logic & languages; Machine & Deep Learning; Calculus, Probability, Statistics & Advanced Linear Algebra; Data Science, Data Visualization & Agentic AI
- Executive Member - VITB Model UN Club
- Executive Member - VITB Eureka Research Club

Apeejay School Nerul Apr 2022 - Jun 2025

PCM + Economics (CBSE) · Navi Mumbai, Maharashtra

- Deputy Opposition Leader - Youth Parliament (2024)
- Debate Team (2024)

SKILLS

Programming: Python, TypeScript, Java (learning)
AI / ML: Machine Learning, Deep Learning, Computer Vision (YOLO), FinBERT / NLP, Imitation & Reinforcement Learning
Simulation: CARLA autonomous-driving simulator, Orbital mechanics / N-body
Platforms: React, Vite, Firebase, Vercel, Cloudflare, Meta WhatsApp Cloud API
Data: Data analysis, Statistical analysis, Data visualization, Financial literacy
Soft skills: Research & writing, Public speaking, Teamwork, Time management, Communication

HONORS & AWARDS

- 99.8 percentile (Rank under 600) - MH-CET state entrance examination (2025)
- Best Delegate - Apeejay High School Model UN Conference (2024)
- Special Mention - Apeejay High School Model UN Conference (2023)
- Rank 24/450 - District Chess Championship (2023)
- Rank 11/450 - District Chess Championship (2022)
- Rank 43/400 - District Chess Championship (2018)

CERTIFICATIONS

- VITyarthi: Fundamentals of AI-ML · Digital Literacy · Fundamentals of Python · Programming in Java (in progress)
- Coursera: Deep Learning Specialization - Andrew Ng (in progress) · Data Science Specialization - IBM (in progress)
- 9 certifications in Quantitative Finance, Algorithmic Trading & Financial Markets

LANGUAGES

Hindi (native) · English (proficient) · French (oral proficiency)
